A reconciliation between GAAP and Non-GAAP measures for the current quarter and prior year quarter is attached as an appendix to this document. Other historical reconciliations are available at www.plantronics.com/investor.

Use of Non-GAAP Financial Information

To supplement our condensed consolidated financial statements presented on a GAAP basis, we use non-GAAP measures of operating results, including non-GAAP operating income, non-GAAP net income and non-GAAP diluted EPS which exclude certain non-cash expenses and charges that are included in the most directly comparable GAAP measure. These non-cash charges and expenses include stock-based compensation related to stock options, restricted stock and employee stock purchases made under our employee stock purchase plan, purchase accounting amortization, accelerated depreciation, and early lease termination charges, all net of the associated tax impact, tax benefits from the release of tax reserves, transfer pricing, tax deduction and tax credit adjustments, and the impact of tax law changes. We exclude these expenses from our non-GAAP measures primarily because Plantronics' management does not believe they are part of our target operating model. We believe that the use of non-GAAP financial measures provides meaningful supplemental information regarding our performance and liquidity and helps investors compare actual results with our long-term target operating model goals. We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting and analyzing future periods; however, non-GAAP financial measures are not meant to be considered in isolation or as a substitute for, or superior to, gross margin, operating income, operating margin, net income or EPS prepared in accordance with GAAP.

As a company with significant global operations and sales, fluctuations in foreign currency exchange rates may have a material effect on our reported results. Consequently, we also present supplemental metrics as identified in the reconciliation within this release "on a constant currency basis" which excludes the impact of currency exchange rate fluctuations. The constant currency presentation, which is a non-GAAP measure, is intended to supplement our reported operating results and, when considered in conjunction with the corresponding GAAP measures, facilitate a better understanding of changes in the metrics from period to period and the core operations of the Company. We calculate constant currency percentages by removing any hedge gains or losses from the particular metric in the current period and then converting our current period local currency financial results using the foreign currency exchange rates in effect during the prior year period and comparing these adjusted amounts to the corresponding current period metric.
